SAUNA

**SAUNA
HEATER**

01

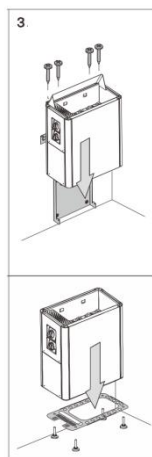

Internal Control Series

Advantage:

1. Adopt manual control to reduce purchasing costs.
2. The time controller adopts a preset range of 12 hours, which can start counting down after 8 hours and operate for 4 hours of heating, making your sauna experience without waiting.
3. The temperature controller can set a maximum temperature of 85 degrees Celsius and a maximum safety protection temperature of 110 degrees Celsius; Make you use it with peace of mind, even if it overheats or you forget to turn it off, it will automatically shut down.
4. Two flexible installation methods, ground mounted parts and wall mounted parts, suitable for different sauna environments of customers.

External Control Series

Advantage:

1. The appearance design is fashionable and simple, the intelligent control panel is intuitive, and the operation is convenient.
2. Precise temperature control, upgraded comfort, electronic control can accurately control the temperature you need within your expected range.
3. Safe and reliable, the 12V weak current touch panel can better protect your safety, worry free to use, and the separated control has more advantages for later maintenance.
4. Beautiful and elegant, enhance your sauna style.

PRESENTATION

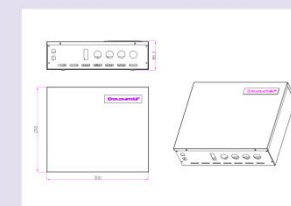

SAUNA CONTROL

The controller of the Donomiti BB90 sauna stove adopts a minimalist design language, achieving a perfect fusion of technology and fashion aesthetics. The control panel is made of matte glass material, integrating precise temperature control and intelligent interaction, and equipped with triple safety protection (overheating power-off/leakage protection/waterproofing).

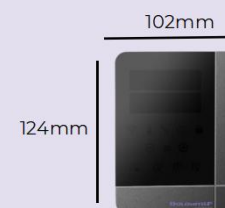

The Donomiti CH series sauna stove controller is suitable for high-power sauna stoves. It has built-in WIFI and can be remotely controlled through an APP. The heating program is pre-set in advance, allowing you to enjoy a constant temperature sauna experience immediately when you get home

PRESENTATION

POWER

The POWER all stainless steel furnace body provides better insulation function and can continuously provide heat to the room. The sauna stove can be placed on the ground to evenly heat the entire sauna room. Professional and powerful power can keep humidity and temperature stable for a long time, making it the ideal choice for health spas, club hotels, resorts, indoor swimming pools, and large families. The shared joy makes the sauna experience more enjoyable. When the heating wire needs to be replaced, the disassembly process is simple, which reflects the designer's humanized consideration for easy user operation.

PILLAR

The PILLAR sauna stove adopts advanced laser hollowing technology, carefully carving delicate and complex patterns that are not only pleasing to the eye, but also achieve a perfect integration of functionality and aesthetics. Every inch of stainless steel material has been rigorously screened and finely polished to ensure its excellent corrosion resistance and durability. The unique laser hollow design not only endows the sauna stove with unparalleled visual impact, but also plays a crucial role in the heating process. Through precise hollow patterns, heat can be evenly and efficiently dissipated throughout the entire sauna room, allowing every user to enjoy a warm and comfortable sauna experience. It will surely become a beautiful scenery in your home or commercial sauna space, leading you into a new and better era of sauna enjoyment.

SPACE

SPACE is the perfect choice for medium-sized saunas. When you want a sturdy structure, reliability, and stylish modern design, the SPACE sauna stove's sturdy structure and excellent maintainability make it perfect for those who frequently use saunas and enjoy steam for long periods of time. The heating element is separated from the stone, thereby extending the service life of the heating element. A large amount of stones ensure softness and sufficient steam. Efficient air circulation can quickly heat up sauna rooms.

COMPLIANCE

VERIFICATION OF COMPLIANCE

No.:	LVD GZES2501000169HS
Applicant:	Dolowitz (Foshan) Equipment Co., Ltd. 4-5-3, Futian Road, Longtan Qilong Road, Xingtan Town, Shunde District, Foshan, Guangdong, China
Manufacturer:	Same as applicant
Product Name:	Sauna heater
Product Description:	Sauna heating appliance
Model No.:	TH30, TH45, TH60, TH80
Trade Mark:	Dolowitz®
Rating:	400 V 3N ~, 50/60 Hz TH30: 3000 W; TH45: 4500 W; TH60: 6000 W; TH80: 8000 W
Protection against Electric Shock:	Class I
Degree of Protection:	IPX4
Additional Information:	—
Sufficient samples of the product have been tested and found to be in conformity with	
Test Standard:	EN 60335-2-43:2011 + A11: 2023 + A1: 2023 + A2: 2023 EN 60335-1: 2012 + A11: 2014 + A13: 2017 + A1: 2019 + A14: 2019 + A2: 2019 + A15: 2021 + A16: 2023 EN 62233: 2008
as shown in the	
Test Report Number(s):	GZES250100016901

This Verification of Compliance has been granted to the applicant based on the results of tests, performed by Laboratory of SGS-CSTC Standards Technical Services Co., Ltd. on sample of the above-mentioned product in accordance with the provisions of the relevant harmonized standards under the Low Voltage Directive 2014/35/EU. The CE marking can be affixed, under the responsibility of the manufacturer, after completion of an EC Declaration of Conformity and compliance with all relevant EC Directives. The affixing of the CE marking presumes in addition that the conditions in annexes III and IV of the Directive are fulfilled.

S6A SERIES

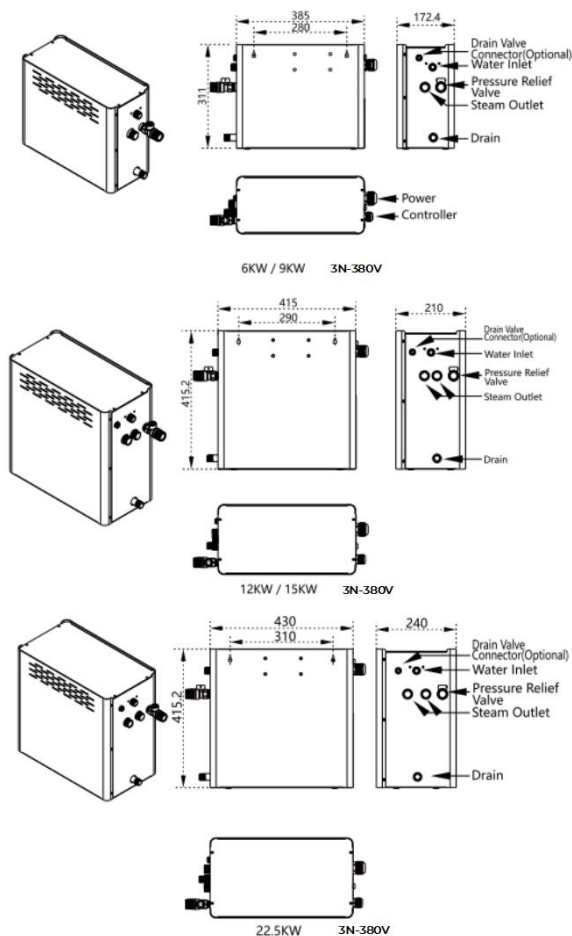

The S6A Series sauna steam engine features a space grey metal body with a curved glass touch panel, and geometric cutting lines to create a futuristic sense of technology. The ultra-thin integrated design, combined with automatic water injection and drainage ports, retains industrial aesthetics while simplifying the operation process. The matte anti fingerprint coating ensures long-term use and maintains a pioneering texture, perfectly matching the minimalist style of modern smart homes.

How to Enjoy Ice Baths

- 1:Start with the Right Temperature**
Begin at 15°C. Gradually decrease by 1°C as you adapt, aiming for an optimal 3°C.
- 2:Set a Duration Plan**
Start with 30 seconds, then increase by 30-second increments until reaching 10 minutes.
- 3:Master Breathing Techniques**
Effective breathing helps maintain calm and manage stress or cold during the bath.
- 4:Determine Frequency**
Frequency varies based on goals. Postworkout recovery? Do it post-exercise. Some opt for 2-3 times weekly, daily, or even twice daily—adjust as long as

Suitable Users for Ice Baths

Ice baths are generally safe for most people under normal conditions. However, individuals with mobility, sensory, or cognitive impairments should only use ice baths under supervision and only if they fully understand the risks and proper usage. Gradually increase exposure time and exercise caution when bathing alone. Children near ice baths must be supervised to prevent misuse or access to maintenance tasks. Always cover the tub when not in use. Ice baths are not recommended for minors. Pregnant women and individuals undergoing treatment (e.g., heart disease, diabetes, high/low blood pressure) or with infectious conditions must consult a doctor before use.

Science of Ice Bath Benefits

Boost Metabolism

Cold baths activate metabolism by stimulating brown fat production. Studies show a 15% calorie burn increase within 6 hours post-ice bath.

Enhancing Brain Function

Exposure to cold environments stimulates brain chemicals that regulate sensation, focus, and concentration. This explains why cold water immersion naturally balances the nervous system and enhances neurotransmitter levels.

Accelerating Muscle Recovery

Cold water immersion not only alleviates exercise-induced muscle damage but also proves more effective than passive recovery in positively impacting muscle strength performance and post-exercise soreness. This therapy enhances

Improving Sleep Quality

Rest patterns are triggered and regulated by the brain and nervous system, both of which are positively influenced by ice baths. Following the initial cold shock, your body calms down and enhances its adaptability to environmental changes. This process lowers core body temperature, promoting deep, restorative sleep. Ice baths have been shown to reduce time to fall asleep by up to 15% while improving overall sleep quality and duration.

Easing Common Pains

Studies show regular ice baths can elevate norepinephrine levels to five times normal daily amounts. This neurotransmitter effectively reduces inflammation while relieving muscle and joint discomfort.

Enhancing the Immune System

Cold baths stimulate white blood cell production and induce lymphatic system contraction, driving fluid through lymph nodes. This process aids detoxification and strengthens immune function.

Stress Relief Through Ice Baths

Ice baths have been proven as an effective adjunct therapy for stress relief, reducing cortisol levels. Regular practice alleviates anxiety and enhances mood.

Delaying Physical and Mental Aging

Cold baths improve blood circulation while reducing resting heart rate and blood pressure. Studies suggest a 10% reduction in resting heart rate equates to being biologically 10 years younger. Regular cold baths promote physical and mental balance, comprehensively slowing aging processes.

PRESENTATION

INFRARED

**Developed in the
second half of 2025**

04

INFRARED

Core Health Functions:

Promote circulatory metabolism

Far infrared radiation penetrates subcutaneous tissue 4-5 centimeters, accelerating blood circulation and metabolism, improving local oxygen supply and nutrient delivery.

Under low temperature conditions (40-75 °C), one can sweat a large amount, metabolize aging waste such as lactate and cholesterol, and relieve fatigue.

Relieve pain and stiffness

Thermal energy penetrates deep into joints and muscles, reducing inflammatory reactions and having a significant soothing effect on arthritis and muscle soreness.

Clinical data shows that continuous use for two weeks can reduce pain scores by about 30%.

Beauty and shaping

Activate skin cell activity, promote collagen regeneration, reduce pigmentation and acne, and enhance skin radiance.

The far-infrared resonance effect accelerates fat burning and assists in body shape management.

Immune regulation

Stimulating white blood cell production, regular use can increase immune cell activity by about 20%.

Relax both physically and mentally

Far infrared calming the nervous system, improving sleep quality, and releasing stress.
